ClearCast

POWERED BY CapTech

Trusted across industries, ClearCast is an EHS management software developed by CapTech that streamlines reporting, planning, and forecasting, resulting in significant cost savings, operational efficiencies, and more predictable outcomes.

Leverage advanced technology to address your toughest business challenges, optimizing sustainability, safety, and resource management. Achieve significant ROI through innovative solutions for a holistic approach to operational excellence.

MISSION & VISION

We envision a future where companies effortlessly manage regulatory compliance, sustainability goals, and safety responsibilities. By streamlining compliance and increasing foresight, ClearCast helps ensure you stay competitive and adaptable in ever-changing conditions.

HOW IT WORKS

ClearCast is a SaaS solution that simplifies sustainability and safety management by organizing enterprise data and processes into a single, intuitive interface. Manage and predict events, generate submission-ready reports, create custom 'what if' scenarios, assess risks, and identify opportunities all in one place. Our sophisticated algorithms and proprietary AI models optimize planning and spend across your organization.

VALUE PROPOSITION

We offer a purpose-built, affordable solution specifically designed to tackle the real challenges of EHS.

Unlike competitors, our tool seamlessly integrates with your existing data, ensuring minimal disruption to current processes. ClearCast is not just a tool — it's a comprehensive solution that empowers you to achieve your goals with precision and efficiency.

FEATURES

- Automated Data Integration
- One-Click Reporting
- Incident Management
- Audit-Ready Reporting
- Regulatory Change Monitoring
- Dynamic Forecasting
- Emission Reduction Recs.
- Easy Data Aggregation
- Resource Management
- Intelligent Risk Mitigation
