

CapTech's Green Journey

2019

CapTech joined the **Green Business Benchmark (GBB)** to understand and baseline our green initiatives across:

COMMUNITY/SOCIETY

CONSUMPTION/WASTE

ENERGY/EMISSIONS

GOVERNANCE

TRANSPORTATION

WATER USAGE

WORK FROM HOME

WORKPLACE/CULTURE

2022

CapTech Cares program formed, which includes an environmental focus to ensure sustainable actions and controls are established as part of our responsible business practices companywide

2023

Platinum Certification reached with the Green Business Benchmark for our greening efforts and responsible business practices that positively impact our environment

2024

Taking our greening efforts to the next level, our CapTech Cares program set three efforts into motion that are essential to our progress:

- Baseline year for Scope 2, and Scope 3 GHG emissions reporting
- Target year to launch our Environmental Management System (EMS) based on ISO 14001-2015 standards
- EcoVadis survey and assessment completed to provide us with a scorecard and corrective action plan

2025+

Build 2024's results into an actionable path forward to continuously improve our environmental management
